

Action 77: NWS16 - Provide further supporting information on any legal agreements to still be finalised before work can start on site - Dragoon Court.

The site still has an active permission and is in single ownership. Six applications to approve conditions have been submitted, with the a condition approved in 2022 that addressed intrusive investigations. More recently a further approval of conditions in relation to a number of elements of the scheme, such as window detail, was submitted in late September this year. This indicates a clear intention to develop the site. There are no known legal constraints.
